

# SPRING CLEAN

at *NUTRI-CLEANSE*

## 10 % off 1st Treatment

THE digestive system is like a waste disposal unit and sometimes it gets clogged up.

Anyone who suffers from constipation will know exactly how that feels, like 70 per cent of the UK population, who suffer from constipation.

If waste is not removed from the

system, not only can it be painful, cause fatigue, weight gain, skin complaints and irritability, but it can also cause serious health problems.

Colon cancer is the second biggest cancer killer.

Constipation can also affect one's love life because it can be too painful or make people feel unattractive

## Colonic Irrigation

- A new system from America allows total privacy and maximum comfort
- Colonic irrigation is a simple process of passing warm filtered water into the colon through a self inserted thin tube, to release all the old waste in the colon.
- The tube is inserted by the client in private, with the therapist returning to the room when the client is fully covered
- The treatment can help a wide range of health conditions including constipation, IBS, bloating, skin problems, weight issues, tiredness & fatigue & many more.

## **Electro Lymphatic Drainage**

New equipment from  
America - is the first of  
its kind in Spain

Your lymph system is one of the body's garbage removal systems.

When the system becomes sluggish illness & disease occur.

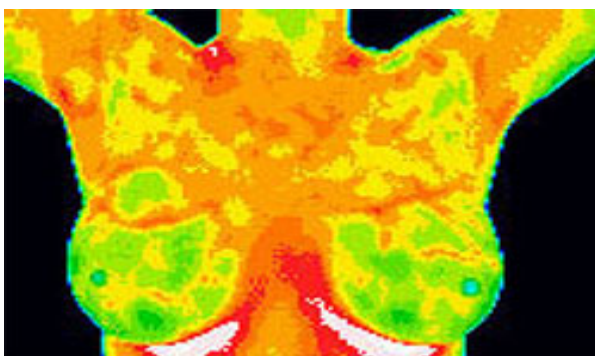

This pain free treatment can reach areas that manual massage cannot reach, vibrating & stimulating the lymph nodes even under the bone structure.

Treating problems that might be otherwise be too painful to massage such as ME & Fibromyalgia, swollen & inflamed areas & arthritic problems.

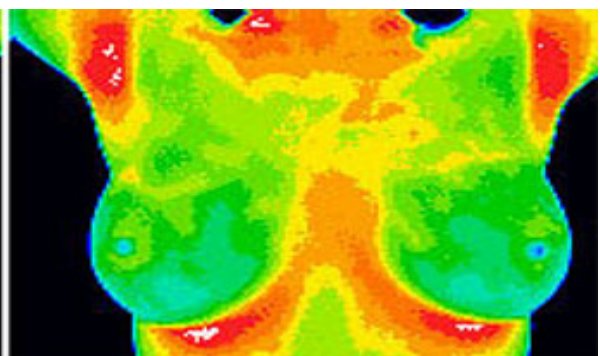

Providing immediate blockage relief, removing toxins & boosting the immune system

### **Thermal Images of Congestion of the Chest Area**

Before Treatment

After 2 ELT treatments
